- Composite body & steel frame
- Natural materials available for body (linen) & seats (vegan leather) / High recyclability
- Refrigerated compartments (up to 35l)
- Fresh air cooler system for passengers

Golf courses, resorts, tourist spots, or industrial spaces, Green'Air is the perfect option for short distances (40 to 60 km). Available within two width, 1.5m and 1.2m, Green'Air takes care of its passenger by offering storage compartments, two of them naturally refrigerated by the engine cold exhaust. Simple to use and to maintain, its compressed air tank can be refilled within only one minute (air station), and last for over 20 years. This modern design buggy will also be homologated for public roads uses (L7e norm).
